We are having standardized machinery as well as equipment's which are being checked and maintained regularly. All our equipment's are of standard companies which are in up to date condition.

## Safety & Quality Norms for ISBL Area in Refinery

### Safety Norms:-

1. Assigning the right employee to the task is an opportunity for the supervisor to evaluate the risk, complexity, and frequency of performance of the task.
2. Experience, proficiency, personal readiness, and previous risk-taking behavior should be considered in light of the risk and complexity of the task, as well as how often task has been performed.
3. Ensure use of 5 mandatory PPE 's (i.e. Safety Shoes, Safety goggles, Hand gloves, Safety helmet, Reflective jacket/ Boiler suite)
4. Only Trained/validated persons shall be deployed for the job.
5. Area shall be kept clear & good housekeeping shall be maintained.

### Quality Norms:-

1. Ensure proper mixing of paint, Use power stirrer except for airless spray.
2. Verify the application of correct paint system.
3. Verify the paint coat DFT and visually check the painted surfaces.
4. Check cleanness of surface prior to application of primer / Intermediate / final paint, as applicable.
5. Visually check the painted surfaces and verify the DFT.
